GREENEVILLE

The fourth lecture delivered by Rev. D. T. Trick in the series on The Plan of the Ages was on The Dispensation of Human Conscience. In this position we were dealing with the principle of government. Man in the previous period was in communion with God, God as a personal factor. After the expulsion from the garden and the personal presence of God, man is controlled by the principle of conscience. In the form of conscience, a moral philosophy is still discussing the fact and form of conscience. But for the man who is willing to accept the word of God, conscience is the voice of God within the soul of man. This is the result of the creation fact, the image of God in man, and the communion with God in the garden.

Conscience, then, during this period is the governmental force in human relations in a threefold sphere of action.

1. The religious sphere. The principle of religion is innate, intuitive and not the result of our Bible. The Bible is not a source of our guide to our religious life. The heathen have not the Bible exercise themselves on the religious plains. Whence is the source of their religious life? It is found here, the voice of God in the soul.

2. The moral. There are acts of human life that are moral. Sin has become a factor of life and on the plain of morals must be overcome. Even the heathen makes moral distinctions.

3. The social relation. Man is his brother's keeper. And one day will have to render an account of his stewardship.

This that we call conscience is the discriminating power of human life between good and evil, right and wrong. It also accuses or excuses.

The extent of the light we determine the degree of the processes but not the fact. Conscience makes cowards because it is the voice of God in the human heart for self government and justice.

LITTLE CHILD DRINKS CARBOLIC ACID

The 17 months' old daughter of Mrs. Joseph Kornish of Fitchville got hold of a bottle of carboic acid at the Kornish home Sunday afternoon about 5 o'clock and drank enough of it to cause her death about two hours later. Dr. J. W. Callahan was called from this city to treat the child almost as soon as the accident had been discovered and he made a quick trip to Fitchville, but was able only to alleviate the sufferings of the little girl to some extent as the burns from the acid were too severe to hope for the child's recovery.

The mother had stepped out of the house for a few minutes, leaving the child sitting in a chair. Hearing the child's screams she rushed back to the house to find that the little one had drawn the chair up to the table, climbed onto the table and taken a bottle of carboic acid from behind a pitcher where it had been put on a shelf for safe keeping.

A five and a half year old sister of the baby tried to take the bottle away and was burnt about the mouth in doing so and the little one succeeded in drinking practically the entire contents of the bottle.

The father of the child was at work in the woods near Fitchville when the accident happened.

Historical Post Cards at Library.

What will no doubt be a source of pleasure to the patrons of the Otis library is the placing of historical post cards in the large glass frame hung at the right of the charging desk.

The post cards are loaned by Mrs. Elsie H. Rogers regent of the Faith Trumbull chapter, D. A. R., and is one of the many bits of pleasure the chapter has planned to do in the midst of its more serious work.

Each month the cards are to be changed and new ones hung, whose pictures will be applicable to an historical event or character of the country's history.

Saturday thirty-seven cards to commemorate George Washington were put in the card case and make a most attractive exhibit.
